

MAINTENANCE GUIDE / ANTIQUE BRASS

Please read the following maintenance guide before using your new antique brass product to ensure a well-protected and beautiful surface.

Antique brass is a term used to describe a finish which is to be found on the surfaces of MUUBS' Hitch series. The natural finish of polished brass is shiny while the antique finish is darker than natural brass and absorbs more light than it reflects.

The antique brass is often used in combination with other materials, including iron, on MUUBS' products to add a more raw expression. Structure and color on the surfaces are unique from product to product as it is molded into a sand mold. One of the best things about antique brass is that it is easy to mix and match with other furnitures and accessories and thus create an unqiue and beautiful interior design.

GENERAL MAINTENANCE /

- Daily cleaning can be done by wiping off dust with a dry and clean cloth.
- The products do not tolerate water.
- Do not place hot or wet items directly on the surface.

If any further questions, feel free to contact MUUBS.
