

MAINTENANCE GUIDE / CEMENT

Please read the following maintenance guide before using your new cement product to ensure a well-protected and beautiful surface.

The beautiful Kanji jars from MUUBS are made of cement and can be used for both outdoors and inside. The large jars are suitable for flowers and herbs in the garden, but can advantageously also be planted with small trees to make "small rooms" on the terrace.

If the jars are to be used inside, they must be placed on a surface that tolerates water. The jars are frost-proof down to -18 degrees. Note this applies only to the sizes: 22, 35 and 50 cm. The small flowerpots/jars in size 11,5 and 12,5 cm are not frost-proof and must be taken inside during winter months.

Note that the jars are not food-safe and that the color of the surface may vary.

GENERAL MAINTENANCE / No maintenance.

TIP / The small jars can be used on the garden table for decoration and for flowers when the garden is filled with guests a summer evening.

If any further questions, feel free to contact MUUBS.
