

MAINTENANCE GUIDE / LAVA

Please read the following maintenance guide before using your new lava product to ensure a well-protected and beautiful surface.

The products are made of lava from the Indonesian island, Java. The lava is chopped into blocks so it is easier to work with. Then it is either turned, chiseled or crocheted - depending on which MUUBS product is to be produced. Finally, the lava products are treated with a water-based matte top coating which is approved for food contact.

GENERAL MAINTENANCE / We recommend to clean the lava product with a wringed cloth consisting of hot water and detergent.

If any further questions, feel free to contact MUUBS.
