

# MAINTENANCE GUIDE / STONEWARE

Please read the following maintenance guide before using your new stoneware product to ensure a protected and beautiful surface.

The stoneware from MUUBS includes the series, Ceto, Mame and Yake. Common to all three series is the handmade and unique look as the forms used in the production do not have exactly the same design. Furthermore, all three series are treated with a reactive glaze which give each piece of stoneware a unique expression and character.

**ASSEMBLY INSTRUCTION** / Stoneware is suitable for use in oven up to 260° C and under the ovens grill element. Stoneware from MUUBS tolerates likewise microwave, freezer and dishwasher. Stoneware can never be used directly on the grill, the stove or be placed directly on the bottom of the oven.

**IMPORTANT** / Never use your stoneware product on open fire or on the grill no matter type and design! Never add liquid while the product is hot and placed inside the oven! This can cause that the product cracks which can cause personal injury or damage other materials. If you need to add liquid during the cooking, the product must be taken out of the oven, cool for 10 minutes and then add lukewarm liquid, including wine, beer, bouillon etc.

## **CARE AND USE /**

### **Oven**

Tolerates up to 260° C. Always use oven mitts when handling hot platters.

### **Grill element in the oven**

When using the stoneware under the ovens grill element, always make sure that there is space at least 6,5 cm between the stoneware and the grill element.

### **Microwave**

MUUBS stoneware can be used in the microwave. The handles can be hot if the product is in the microwave for longer time, especially if the handles are surrounded by plastic wrap. Therefore, cover only the open part of the platter and let the handles be free.

### **Refrigerator and freezer**

MUUBS stoneware can be used in refrigerator and freezer. The stoneware tolerates -18° C.

### **From freezer to oven**

Do not insert the stoneware with frozen food in a hot oven. Place the stoneware with the frozen dish in a cold oven and let the oven warm up together with the platter.

**CLEANING OF STONEWARE** / Before using the stoneware, it should be washed off in hot soapy water, rinsed off and dried thoroughly. For daily cleaning, the stoneware must be cooled down completely after use whereafter it should be washed and dried as mentioned before. The stoneware tolerates also dishwasher. Stoneware from MUUBS has a glazed surface which is easy to clean. Besides, the glaze is hygienic as it neither absorbs smell, taste nor color from foods.

**REMOVAL OF STUBBORN FOODSTUFFS** / Let the stoneware cool down thoroughly and fill it afterwards with hot soapy water. Let the soapy water dissolve the leftovers in approx. 10-20 minutes. Afterwards, wash off the product as usual.

**DURABLE STONEWARE** / All products in stoneware from MUUBS are original designs and partly handmade which makes every piece unique. There can occur minor variations from product to product.

**WHAT DOES THE WARRANTY NOT INCLUDE?** / The warranty does not include damages caused by normal wear and tear, accidents, misuse or commercial use. Scratches, stains, discolouring or corrosion from overheating or another incorrect use of the product is not included either. MUUBS is not responsible for damages inflicted by push or loss.

Some type of cutlery can make dark markings/scratches on plates, cups etc. Both the metal itself, the content of nickel and the design of the knife's grill blade are important for whether the cutlery makes black markings/scratches or not.

If any further questions, feel free to contact MUUBS.
