

MAINTENANCE GUIDE / CARPETS

Please read the following maintenance guide before using your new carpet to ensure a well-protected and beautiful surface.

It is with an immense devotion to the health of the planet that we at MUUBS has created a unique collection of Danish-made rugs crafted from up to 40% nylon yarn sourced from used fishing nets found drifting around in the world's oceans. The fishing nets are collected and broken down physically and chemically - then it is recreated into a strong yarn used in the weaving. In this way, waste becomes a valuable resource for the benefit of the environment and is given new life as a beautiful interior design piece.

The sustainable carpets are made in collaboration between MUUBS and Egetæpper, Denmark. The collection consists of several carpets, each with a unique design. They are inspired by the layers of life and Earth.

ABOUT THE CARPETS /

- Easy to clean
- Durable
- The beautiful patterns make the carpets unique

GENERAL MAINTENANCE / We recommend daily cleaning with vacuuming.

HOW TO REMOVE STAINS?

1. Remove dirt by dipping with a dry cloth or paper towel without color.
2. Use warm water to dip the area and then soak up the liquid as much as possible with a dry cloth.
3. If water cannot remove it, proceed with universal stain remover.
4. If none of the above steps help, it requires special treatment.

NB! Always work the stain from the outer edge towards the center and never use chlorine-containing products, as there is a risk of bleaching.

If any further questions, feel free to contact MUUBS.
